

MeshMed 2012 is a workshop held in conjunction with MICCAI 2012 in Nice on October 1. The topic of the workshop is broadly based on three overlapping topics: Mesh processing, the image-to-mesh (I2M) pipeline, and surface analysis and extraction. While numerous I2M technologies have been developed, rarely do they get sufficient exposure for out-of-field researchers have the necessary expertise to know the nuances between them. Similarly, researchers in geometry, meshing, and surfacing often consider their problems in independent settings, external to their use in a specific imaging pipeline. In particular, there is a need for designing novel technologies that strictly focus on medical image domains. This workshop proposes to improve the cross-pollination of the imaging and meshing efforts by considering how meshing fits into the end-to-end pipeline from image acquisition to clinical analysis.

### Topics

We invite papers on the following (non-exhaustive) list of topics:

- Mesh representations, generation, extraction, visualisation and processing.
- Image-to-mesh pre-processing, conversion, and post-processing.
- Surface representation, extraction, matching, and analysis.

### Organizers

Joshua A. Levine (SCI Institute, University of Utah)

Rasmus R. Paulsen (Technical University of Denmark)

Nikos P. Chrisochoides (Old Dominion University)

Yongjie Zhang (Carnegie Mellon University)

Sylvain Prima (IRISA/INRIA Rennes, France)

Ross T. Whitaker (SCI Institute, University of Utah)

### Program committee

Michael Bronstein (University of Lugano, CH)

Jakob Andreas Bærentzen (Technical University of Denmark)

Gary Christensen (University of Iowa, USA)

Tron Darvann (Copenhagen University, DK)

Michael Kazhdan (Johns Hopkins University, USA )

Mads Nielsen (Copenhagen University, DK)

Sebastien Ourselin (University College London, UK)

Daniel Rueckert (Imperial College London, UK)

Suzanne M. Shontz (Pennsylvania State University, USA)

Martin Styner (UNC Chapel Hill, USA)

Lasse Riis Østergaard (Aalborg University, DK)

Miguel AG Ballester (ALMA IT Systems, Spain)

Andrey Chernikov (Old Dominion University, USA)

Tim Cootes (University of Manchester, UK )

Cindy Grimm (Washington University in St.Louis)

Sebastian Kurtek (Florida State University, USA)

Wiro Niessen (Erasmus University Rotterdam, NL)

Mauricio Reyes (University of Bern, CH)

Jonathan Shewchuk (UC Berkeley, USA)

Anuj Srivastava (Florida State University , USA)

Lilla Zöllei (Harvard Medical School, USA)
