NAME

standard – standardize sequence to desired mean and stddev

SYNOPSIS

standard [−**m** *mean*] [−**s** *std*]

DESCRIPTION

standard standardizes a sequence to a desired mean and standard deviation. Input format must be byte, short, int or float. Output format is float.

OPTIONS

−**m** *mean*

specifies the desired mean, defaults to original mean

−**s** *std*   specifies the desired standard deviation, defaults to 1.0

SEE ALSO

scale(1), saturate(1)
