

The good project start

Rasmus R. Paulsen

DTU Compute

Rasmus

- Master of Science (Eng), DTU
- R&D in startup Pronosco
- Industrial PhD with Oticon A/S
- R&D Oticon A/S
- Associate professor at DTU Informatics/Compute
 - Medicin og Teknologi
 - It og Sundhed

Choosing a project

- Find the right supervisor with the right project
- All faculty at DTU supervise students
 - BSc
 - MSc
 - PhD
- Most faculty have projects in their cupboards
- We prefer to supervise within our research topic

How do I do

- Identify some supervisor candidates
 - Good teachers
 - Made interesting talks
 - Interesting research area
- Look at their homepage
 - Research
 - Publications
 - Research group
 - Previous supervision

2015

Individualized directional microphone optimization in hearing aids based on reconstructing the 3D geometry of the head and ear from 2D images

[Harder, Stine](#) ; [Paulsen, Rasmus Reinhold](#) (Supervisor)
Technical University of Denmark (DTU), pages: 193

Type: Ph.D. thesis

Status: Published | År: 2015

Correction of Motion Artifacts for Real-Time Structured Light

[Wilm, Jakob](#) ; [Olesen, Oline Vinter](#) ; [Paulsen, Rasmus Reinhold](#) ; [Larsen, Rasmus](#)
part of: Image Analysis (ISBN: 978-3-319-19664-0), pages: 149-158, 2015, Springer Science+Business Media B.V.,
Presented at: 19th Scandinavian Conference on Image Analysis, 2015, Copenhagen

Type: Article in proceedings (Peer reviewed)

Status: Published | År: 2015 | DOI: http://dx.doi.org/10.1007/978-3-319-19665-7_12

Anatomically Correct Surface Recovery

[Jensen, Rasmus Ramsbøl](#) ; [Nielsen, Jannik Boll](#) ; [Larsen, Rasmus](#) ; [Paulsen, Rasmus Reinhold](#)
part of: Image Analysis (ISBN: 978-3-319-19664-0), pages: 216-227, 2015, Springer Science+Business Media B.V.,
Presented at: 19th Scandinavian Conference on Image Analysis, 2015, Copenhagen

Type: Article in proceedings (Peer reviewed)

Status: Published | År: 2015 | DOI: http://dx.doi.org/10.1007/978-3-319-19665-7_18

Image Registration of Cochlear μ CT Data Using Heat Distribution Similarity

Write a mail

- Who you are and where you know the supervisor from
- Which courses have you taken and how did it approximately go
- What do you want to do and why do you ask this supervisor
 - ECTS
 - Project start
 - Bsc/Msc/special course
- Ask:
 - Do you have available projects or suggestions
 - Can we meet?
- It is ok to "shop around" – but not too much and do not skip the project in the last moment

What should I remember

■ Ask or find out of

- Is the project a part of a larger research project (+)
- Is it possible to be co-supervised by a PhD student (++)
- Is it realistic to write a scientific article (+)
- What kind of supervision can you expect
- How much supervision can you expect
- How many student do the supervisor have
- Can you get some articles describing the project background
- Are the necessary data in place and can you get them
- How much manual work is expected

Non-disclosure agreements

- Be careful!
- Attractive to work with a cool company
- You can not show your work to anyone
 - Not even potential job places
- They will say
 - So cool to work with us – you might be able to get a job
- Be sceptical!

Most important point!

- The grade is solely based on the delivered written work – the report!
 - And the oral defense (which is mostly based on the report)
- No matter how
 - Nice you are
 - Amount of data gathered
 - Manual work done
- It is the documentation of all this that counts!
- You are/will become the expert!

Project start

- Learn about the topic
 - Litterature search and reading (based on articles supplied by the supervisor)
- Start a report from day one
 - Referencemanager : Bibtex, Endnote, RefWorks, Mendeley...
- Write the introduction and problem statement very early
 - Latest three weeks after project start
 - Serve as a contract between you, the supervisor and external partners
- Du not start coding/welding/mixing/experimenting
 - Before your problem statement is clearly written
